DRIVING LICENSE Category B

Profile : I am an engineer specialized in Networking & Artificial Intelligence, with a Master's degree in Telecommunications, Admitted to the M2 Multimedia Networking Master program at Université Paris-Saclay. My background brings together industrial systems, computer and industrial networks, artificial intelligence, signal processing, telecommunications and automation.

PROFESSIONAL EXPERIENCE

Samsung C&T Corporation

2025 – 2026 (1 an)

Instrumentation & Control (I&C) Engineer — Mostaganem, Algérie

- Monitored I&C activities on a large-scale energy project, including SCADA systems, automated equipment supervision, field instrumentation, and industrial networks.
- Integrated and configured the SCADA system within the local network, as well as performed installation and connection inspections.
- Processed data and explored AI-based approaches for optimization and predictive maintenance, in collaboration with Commissioning and QA/QC teams.

Final-Year Project — Green Hydrogen Production

2024 – 2025 (1 an)

Forecasting Platform

Projet — Energie, IA, Data & Développement Web

- Designed a forecasting platform for solar resources to optimize green hydrogen production in Algeria, using an interactive map.
- Developed a web platform with Python/Flask, Leaflet, and Plotly.js for interactive data analysis and visualization.
- Collected and processed meteorological and solar data using the NASA POWER API and SolarGIS, while developing Machine Learning / Deep Learning models.
- Achieved an R^2 score of 0.84 with LightGBM on NASA POWER data.

INTERNSHIPS

•Schneider Electric Internship

Janvier-Février 2024

- Explored industrial automation, digital energy management, and smart grids.
- Studied HV/MV electrical systems, risk prevention, and the operation of control and supervision equipment.

•Stage UDES - Centre des recherches sur les Énergies renouvelables

Janvier 2023

- Explored Smart Grid architectures and communication systems associated with photovoltaic infrastructures.
- Developed an understanding of data acquisition, transmission, and supervision mechanisms between the equipment of a connected energy system.

ACADEMIC EDUCATION

Admis en Master 2 Multimedia Networking : security, deep learning, coding

2026 – 2027

Université Paris-Saclay, France

- Deep & Reinforcement Learning, Information Theory, Signal Processing, CDN, Data Compression, Network Security.,

State Engineering Degree in Industrial network & AI

2022 – 2025

HNSREDD —Batna, Algérie

- TCP/IP ,Profinet/profibus, Smart Grids, Big Data, Machine Learning / Deep Learning, big data .

Master's Degree in Telecommunications

2022 – 2025

HNSREDD — Batna, Algérie

- Digital Communications, Signal Processing, Antennas & Propagation, 4G/5G Wireless Networks.

Preparatory Classes (CPGE) — Science & Technology

2020 – 2022

ESSA Tlemcen — Admitted through the National Engineering Entrance Examination

TECHNICAL SKILLS

IA & Machine Learning

Deep Learning, Reinforcement Learning, TensorFlow, PyTorch, Keras, LightGBM

Networking

TCP/IP, VLANs, Routing, Cisco Packet Tracer (Network Administration), PROFINET/PROFIBUS, CDN, Network Security, SCADA

Development & Systems

Python,C/C++,SQL, Linux,AutoCad, Eclipse, IntelliJ, Android studio , LADDER , TIA Portal , Matlab

Signal Processing & Multimedia

Signal Processing, Data Compression

Scientific Article — Lead Author

JournalGreen ECONOMICS (JomardPublishing)

Publication on AI-based green hydrogen forecasting
DOI: 10.62476/ge.32.65

Speaker & Conference Presenter — 2nd International Conference on Green Hydrogen

ÉcoleNationale SupérieuredesForêts (HNSF)

(2023)

Presentation at the National Higher School of Forestry (Khenchela) on forest biomass, intelligent energy modeling, and AI for Algeria's national hydrogen strategy.

CERTIFICATIONS & AWARDS

- Top Project - Green Byte : Innovation e-waste (Janv 2025)
